S&L Digital Signage

CASE STUDY

Following a successful first year trialling a touchscreen digital map table at its Heron Park sales office, Satterley commissioned S&L Digital Signage to upgrade the two static map tables at its Honeywood sales office to touchscreen digital versions.

Popular with Satterley's sales teams due to the digital technology's capacity to offer more information to its customers, S&L Digital Signage designed and fabricated two leaf shaped map tables, incorporating 65" touchscreens.

The digital touchscreens feature some great new details including 'pinch to zoom' and pop-up information. These new features were added to previously successful content i.e. lot pop-up information, galleries and a 'register your interest' form that links to Satterley's mailing list.

*"...The project was delivered on time and we think it looks amazing!"*

CASE STUDY

3 **Honeywood Primary School**  
Our own community primary school makes it easy for you to stay in close touch with your kids' progress, and you can even walk them to school.

7 **Pathways and boardwalks**  
Allowing people to meander through the bush and wetlands, with benches along the way to stop and connect with nature.

11 **Parklands**  
Honeywood encourages a fresh, open-air life, with these spaces inviting a kick of a football or just some boisterous running around.

2 **Estate entrance**

1 **Honeywood High School**  
Our future community high school will provide a state-of-the-art learning environment catering to years 7 to 12.  
2 **Disputed playing fields**  
This exciting open space is being developed to provide a new area for community use.

4 **Disputed playing fields**  
This exciting open space is being developed to provide a new area for community use.
