APN Perth Airport Digital Signage Kiosks

S&L Digital Signage

CASE STUDY

APN is a leading provider of outdoor advertising in Australia and New Zealand. As a valued WA digital signage partner to APN, S&L Digital Signage was commissioned to supply digital kiosks within Terminals 1 and 3 of Perth Airport.

Featuring a unique glass floating door designed by digital signage specialist Tim Webb, S&L Digital Signage manufactured and installed single- and double-sided digital kiosks, overseeing the entire project from start to finish.

The digital kiosks loop advertising content, sold to companies and brands by APN's commercial wing, to Perth Airport's many visitors. The kiosks are controlled remotely with Scala software, of which S&L Digital Signage is a Western Australian reseller.
